□ This weight exceeds the current category size, see Priority Post.

Items which qualify for the **Letter/Postcard** rate of postage must be no larger than C5 in size (i.e. the size of an envelope containing a folded A4 sheet).

Dimensions	Min	Max
Length	140mm	235mm
Width	90mm	162mm
Depth	0.18mm	5mm
Weight	None	100g

The **Parcel** rate of postage caters for three dimensional items that are bulkier than a packet. Large items with a light overall weight may be charged according to their **Dimensional Weight**. This reflects the additional cost of transporting light but sizeable items. It is recommended that you calculate the Dimensional Weight for every shipment that you send, then compare this to its physical weight. The greater weight of the two is used to work out the price that we charge you.

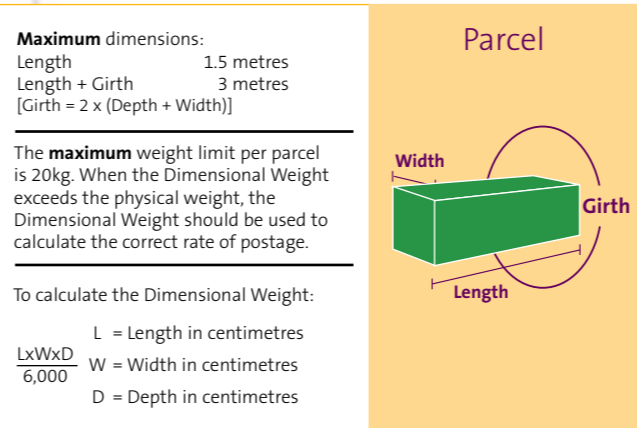

Maximum dimensions:
 Length 1.5 metres
 Length + Girth 3 metres
 [Girth = 2 x (Depth + Width)]

The **maximum** weight limit per parcel is 20kg. When the Dimensional Weight exceeds the physical weight, the Dimensional Weight should be used to calculate the correct rate of postage.

To calculate the Dimensional Weight:

$$\frac{L \times W \times D}{6,000}$$

L = Length in centimetres
 W = Width in centimetres
 D = Depth in centimetres

The **Packet** rate of postage caters for three dimensional items like boxes, tubes and envelopes.

Minimum dimensions are 100mm(L) x 70mm(W) x 25mm(D). The **maximum** dimension for a packet is a combined length, width and depth of 900mm (no dimension can exceed 600mm). In tube form the maximum dimensions (the length plus twice the diameter) must not be greater than 1,040mm, with no dimension exceeding 900mm. The maximum weight limit for packets is 2kg.
